

## **MODULE HANDBOOK**

### **Topographical and Bathymetry Mapping**

**Dr. Supriatna, M.T.**

Undergraduate Study Program for Geography  
Faculty of Mathematics and Natural Sciences  
Universitas Indonesia

---

---

Module designation	Topographical and Bathymetry Mapping
Semester(s) in which the module is taught	Sixth (6th) Semester
Person responsible for the module	Dr. Supriatna, M.T.
Lecturer	<ol style="list-style-type: none"><li>1. Dr. Supriatna, M.T.</li><li>2. Adi Wibowo, Ph.D.</li></ol>
Language	Bahasa Indonesia
Relation to curriculum	Elective
Teaching methods	Student-centered Learning and combination with Cooperative Learning
Workload (incl. contact hours, self-study hours)	<ol style="list-style-type: none"><li>1. Lectures: 100 minutes per week per semester</li><li>2. Assignment: 120 minutes per week per semester</li><li>3. Independent study: 120 minutes per week per semester</li><li>4. Minutes x weeks x semester: <math>340 \times 14 \times 1 = 4760</math> minutes per semester</li><li>5. Midterm Examination: 100 minutes per semester</li><li>6. Final Examination: 100 minutes per semester</li><li>7. Total workload per semester: 4950 minutes / 82 hours 40 minutes</li></ol>
Credit points	2 (Two)
Required and recommended pre-requisites for joining the module	<ol style="list-style-type: none"><li>1. Surveying and Mapping</li><li>2. Geographic Information System</li><li>3. Remote Sensing</li></ol>
Module objectives/intended learning outcomes	Able to apply and analyze the concept of a topographic mapping project/bathymetry, field preparation, determine the coordinates, first Azimuth, field measurement, bathymetry mapping, and topographic and bathymetry depictions.
Content	<ol style="list-style-type: none"><li>1. Introduction to topographic mapping</li><li>2. Topographic mapping concept (land)</li><li>3. Measurement method (field survey, appointment limit, and counterfeit, area measurement, processing data, depiction, report)</li><li>4. Cut and fill analysis</li><li>5. Topographic mapping regional analysis</li><li>6. Concepts and Technology of Batimetry Mapping</li><li>7. Explanation of the concept of bathymetry mapping (waters) (field survey, appointment area measurement, measurement area, data processing, depiction, report)</li><li>8. Basic Waters Topography Analysis</li><li>9. Regional analysis of bathymetry mapping</li></ol>
Examination forms	-
Study and examination requirements	<ol style="list-style-type: none"><li>1. Group and Presentation Score (40%)</li><li>2. Individual Score (30%)</li><li>3. Mid Examination (15%)</li><li>4. Final Examination (15%)</li><li>5.</li></ol>
