

MODULE HANDBOOK

Spatial Simulation and Modeling

Dr. Supriatna, M.T.

Undergraduate Study Program for Geography
Faculty of Mathematics and Natural Sciences
Universitas Indonesia

Spatial Simulation and Modeling

Module designation	Spatial Simulation and Modeling
Semester(s) in which the module is taught	seventh (7th) Semester
Person responsible for the module	Dr. Supriatna, M.T.
Lecturer	1. Dr. Supriatna, M.T. 2. Adi Wibowo, Ph.D. 3.
Language	Bahasa Indonesia
Relation to curriculum	Compulsory
Teaching methods	Student-centered Learning and combination with Cooperative Learning
Workload (incl. contact hours, self-study hours)	1. Lectures: 100 minutes per week per semester 2. Assignment: 120 minutes per week per semester 3. Independent study: 120 minutes per week per semester 4. Minutes x weeks x semester: $340 \times 14 \times 1 = 4760$ minutes per semester 5. Midterm Examination: 100 minutes per semester 6. Final Examination: 100 minutes per semester 7. Total workload per semester: 4950 minutes / 82 hours 40 minutes
Credit points	2 (Two)
Required and recommended pre-requisites for joining the module	1. Geographic Information System 2. Geographic Information System Lab
Module objectives/intended learning outcomes	The learning achievement of this course is that students will be able to assess and formulate spatial models for spatial decision making based on geographical data and information using geographical information system software. The learning method used and trained is by interactive lectures and active learning through small group discussions and case-based learning
Content	1. Simulation and models concepts 2. Simulation and models concepts in geographic information systems 3. The concept of geographical factors in spatial decision making 4. Spatial decision making concepts 5. Flow of geographic information in spatial decision making 6. Alternative method in spatial decision making 7. Formulation and manufacture of simulations and spatial models for spatial decision making
Examination forms	-
Study and examination requirements	1. Individual Works (20%) 2. Group Works and Presentation (20%) 3. Mid-Term Exam (15%) 4. Final Paper (15%) 5. Presentation (15%) 6. Final Exam (15%)
